## PROJECTS

**Simple ATM Application** — Build using Java and Mysql to perform the CRUD operation.

This is a simple and efficient Automated Teller Machine (ATM) application designed to perform basic banking tasks such as account creation, depositing, withdrawing, balance checking, updating PIN numbers, and managing account details and even remove the account
And we do these tasks for multiple users.

Technology Used: Java, MySQL, JDBC, Object Oriented Programming(OOP)

GitHub:
https://github.com/VigneshMothilal14/Simple-ATM-Application.git

## LANGUAGES
